COMSATS University Islamabad

Bachelor's in Computer Science

Islamabad, Pakistan

September 2020 – Present

SKILLS

MERN, NextJS, REST APIs, Redux, Bootstrap, TailwindCSS, SASS, Git, GitHub, BitBucket, Docker, TypeScript, Postgresql, MySQL, EC2, S3, Elastic Beanstalk

WORK EXPERIENCE

Axontick Technologies, Remote – Junior Full Stack Engineer

December 2023 - Present

- Implemented RESTful APIs to enable seamless communication between front-end and back-end.
- Facilitated in agile development processes, including sprint planning and daily stand-ups.
- Managed 3+ repositories on GitHub, ensuring smooth collaboration between developers.
- Directed the integration of four plus third-party APIs, including emailJS, PassportJS, and Stripe, enhancing functionality, resulting in a 25% increase in customer engagement.

LantroTech, Islamabad – Web Development Intern

July 2023 – August 2023

- Acquired hands-on experience in Bootstrap, Sass, ReactJS, and Typescript for 6 weeks.
- Collaborated with 2 designers for responsive user experiences.
- Developed a design system with 10+ reusable React components for a payment gateway project.
- Facilitated 2 senior developers on BitBucket, enhancing code quality and project delivery.

Bytewise Limited, Islamabad – MERN Stack Fellow

March 2023 – June 2023

- Stood out among a pool of 1800+ candidates to secure a sought-after fellowship.
- Learned 8+ technologies including React, Redux, Node, Express, MongoDB, and Tailwind.
- Facilitated Bytewise community app to manage the applications of approx. 2000 applicants.
- Built REST APIs as part of a 4-member backend team for the community app.

PROJECTS

Be-Well (FYP): A comprehensive mental health platform featuring modules for user profiling, assessment, appointment booking, payment processing, health tracking, recommendations, resources, community forums, AI chatbot, and admin management. Empowering users to access support, assessment tools, appointments, resources, and community engagement in one integrated platform.

Porkbuns: MERN stack application similar to JeopardyLabs, facilitating custom quiz creation and gameplay. Implemented Redux and Passport.js to ensure a seamless user experience. Integrated stripe for payments.

Genius: A NextJS platform with Prisma database that uses OpenAI & replicate AI API to offer 5 AI services Conversation, Image, Code, Video, and Audio generation. User trials and subscription payments via Stripe.

ACTIVITIES

Campus Ambassador - Devsinc

March 2023 – Present

Led Devsinc in planning and executing array of on-campus activities aimed at bridging the gap between academia and industry, fostering collaboration and professional development among students.

Web Development Co-Lead – GDSC COMSATS

September 2022 – August 2023

Coordinated and led engaging web development workshops, concentrating on HTML, CSS, and Bootstrap; mentored attendees to achieve a 25% enhancement in frontend development skills.
